

Bluseal AA10 Anodised Aluminium Sub-Frame System

The Bluseal Aluminium Sub Frame has been specifically designed to provide a strong, reliable fixing point when installing industrial doors onto insulated wall panels. Manufactured exclusively for Bluseal, this unique profile overcomes the challenges of securing heavy door systems to composite and insulated structures.

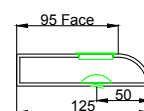

Made from AA10 anodised aluminium and stocked in convenient 5 and 6-metre lengths, the sub frame features a distinctive R30 curved profile to one edge, creating a neat, hygienic finish while delivering exceptional strength and durability.
